

USB WiFi Repeater Quick Start

Rev 1.0

1. Attach your USB antenna to the Repeater's USB port.
2. Connect the power adapter to the USB WiFi Repeater and plug into a 110 outlet.
3. Scan for wireless networks on your computer, and connect to "11N 3G Router AP"
4. Open a web browser (Internet Explorer/Firefox/Opera etc.) and type 192.168.2.1 into your address bar. **WILL NOT WORK WITH SAFARI.**
5. Default username: admin
6. Default password: admin
7. Click on the "Easy Setup" tab and select "USB Wireless Adapter"
8. Click on the "Site Survey" button in the "USB Wireless Adapter Configuration" section.
9. Select the wireless network you want to access and click on "Select"
10. If there is a password required to access this network, enter it in the "Pass Phrase" field.
11. Hit "Next"
12. Under "SSID Choice" rename your personal wireless network to whatever you want.
You can also add security to your network on this page if you wish.
13. Hit "Done" and your repeater will save the settings and reboot. Once it's finished, scan for wireless networks on your computer and connect to the network you have just created.
